

RETINOL YELLOW PEELS

Retinol yellow peel is one of the most powerful cell-communicating, anti-aging ingredients to help re-texturize skin and dramatically reduce wrinkles. It can combat the early signs of aging and correct existing damage. It can treat photo-aging, stretch marks, hyperpigmentation, acne & melasma.

What is yellow peel treatment?

Yellow Peel is a progressive peel, whose effect depends on the number of applied layers. Within a few hours after the treatment, microcirculation increases, oxygen supply to the skin improves and supply of nourishing substances takes place.

Is yellow peel safe?

This peel helps reduce forms of hyperpigmentation, melasma, and acne scarring on the skin, immediately brighten up the complexion. Mild and intense Yellow Peel are formulated for different skin types to give them a peel that is safe and effective with minimum recovery time.

How does a retinol peel work?

Retinol peels work by deeply exfoliating the skin, removing layers of dead and dying skin cells and promoting the production of new skin cells as your skin heals. This healing process takes place over 4-7 days.

Does retinol make your skin peel?

Retinol has a variety of diverse set of biological effects, the main reduction of inflammation and stimulation of collagen production. Common side effects can be irritation, redness, flaking, and peeling.
