

# LACTIC COCKTAIL PEEL

The Lactic cocktail nanopeel is formulated for matured skin. It stimulates natural collagen production, improves hyperpigmentation. It is also effective for skin lightening & moisturization. It lightens the skin & reverses the aging effect.

## How long does it take for a lactic acid peel to work?

For those skin issues that are more extreme, such as erasing fine lines, you will experience the best results with multiple peels over 6 to 8 weeks. Soon enough, you will have the skin that you dreamed of, all with the help of a Leaderma lactic pure peel.

## Is lactic acid good for your skin?

Lactic acid brightens, smooths, and even skin, while also making it look firmer. It helps reduce the appearance of fine lines, wrinkles, and dark spots.

## How does lactic acid lighten skin?

When used on bare unwounded skin, lactic acid sloughs off the outermost skin layers. Consequently, this helps in the removal of the old, damaged and dull epidermal layer. This 'peeling off' reveals younger and brighter looking skin.

## Does lactic acid help with blackheads?

You can use chemicals to dissolve the upper layer of dead skin cells. So things like glycolic acid, salicylic acid or chemical peels. AHAs (alpha-hydroxy-acids) are really good for treating blackheads, so they are basically your glycolic acids and your lactic acids.

## lactic cocktail peel

80% Lactic Acid

2.03 Fl. oz 3x20ml

pH 2.5

Phototypes I-VI

- Leave on peel
- Rinse it with water

## STEP 1 : CLEANSING

### activator Pre-treatment Gel

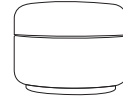

Rinse the face with water. Apply the product gently and massage for 1-2 minutes. Remove with a soft damp cloth or rinse gently with water. Your skin is ready for the treatment.

## STEP 2 : PROTECTION

### protective petroleum jelly

Apply protective petroleum jelly around sensitive areas - periocular area, lips, nasal mucosa.

## STEP 3 : PEEL 1

### ferulic peel

Apply the ferulic nano peel using a brush, leave it for 3-5 minutes & re-apply the second coat, and massage till absorption. If irritation occurs, rinse off immediately with plenty of cold water.

## STEP 4 : PEEL 2

### nano peel

Apply the nano peel using brush & leave it for 3 - 5 minutes. Apply a second coat on the focused area. Leave it until dried or wash or naturalized, if needed. If irritation occurs, rinse off immediately with plenty of cold water. **Note:** Physician using his knowledge may select **PEEL 2** depending on skin condition.

## STEP 6 : Neutralize (Post-treatment)

### neutralizer

Spray **neutralizer** on the skin and clean it with sterilized gauze. Use pressure if necessary. **Note:** Do not neutralize the leave on peels.

## STEP 5 : PEEL 3

### retinol yellow peel

Apply the single-dose **Vitamin C (ampoule)** solution and gently massage till penetration. Apply **Retinol (sachet)** cream and gently massage till total absorption, seal the treatment with 1 layer of cream. Keep it for 6-8 hours. **Do not neutralize.** If irritation occurs, rinse off immediately with plenty of cold water.

## STEP 7 : Sun Protection (Post-treatment Care)

### sun defense

Apply gently a thick layer of **Sun defense cream** on the face & body.

**Personal Care (prescription) :** The physician may prescribe **Leaderma** personal care products for continuing the treatments at home.
