

Melanofree depigmentation mask is formulated to clear the uneven skin tone, diminishes fine lines, increase hydration & moisture to the skin, & whiten the skin in a single treatment.

What is face mask?

Face masks work by driving ingredients closer and deeper into the skin, infusing your pores and allowing the skin to soak up more of the product. Using warm water allows the pores to stay open and for the ingredients to seep in better.

Are face masks good for your skin?

Melanofree depigmentation mask is an excellent treatment for depigmenting and whitening the skin. The nano particles in form of cream penetrate deep into the skin and act on mesoderm.

How to use the face mask?

Apply a thin layer of mask evenly over cleansed face and neck, massage till total absorption. Leave on for 8 - 12 hours. Rinse with water. Use as needed to lighten and brighten the complexion.

Are there any side effects?

Sun sensitivity, skin redness, thickening, or itching.

melanofree depigmentation mask

3ml. 0.50 Fl. Oz.
