

Salisalic nanopeel is specially formulated for teenagers having mild to severe acne. It is also effective for skin rejuvenation. It clears the face in a few treatments, leaves your skin clearer, brighter & more youthful. It is suitable for all skin type.

Salisalic Mandelac nanopeel is formulated for teenagers having mild to severe acne, photo-aged skin, skin spots, greasy skin and skins sensitive to other AHAs. It is also effective for hydration, moisturising and glows. It is also effective for skin rejuvenation. It clears the face in a few treatments.

Salisalic acid peels are used to deeply exfoliate the surface layers of the skin. Salisalic acid breaks the bonds that hold the skin's cells together, causing them to shed away.

How often should you use salisalic acid peel?

A Salisalic acid peel is a progressive treatment that will not provide a final result with one peel. A Salisalic Acid Peel can be performed every 2-4 weeks depending on the condition of your skin.

Do salisalic acid peels hurt?

Because Salisalic acid peels are usually milder peels, they don't have too many side effects. They can include redness and mild tingling sensation.

What are the side effects of salisalic acid?

Severe burning, dryness, or irritation of the skin.
