

Vitamin C nano peel is formulated for skin that requires glow and radiance on the face and body. It is an excellent peel for nourishing vitamin C into the deep layers of skin, resulting in overall rejuvenation of face & body.

What does a Vitamin C peel do?

With the help of a Vitamin C peel, you can slough off the dead skin cells, so your body can replace them with new ones giving you a fresh and vibrant glow. This peel can also help anyone suffering from acne, as it deeply cleanses pores and provides an anti-bacterial action to prevent them from reappearing

Does vitamin C exfoliate skin?

Unlike exfoliants that by way of a chemical or physical process sloughs off dead skin cells, vitamin C serums promote healthy cell turnover (production of new skin cells) which is a major factor in how our skin looks and feels.

vit - C cocktail peel
